Demonstrates command of the subject	2	Has a good understanding of the subject matter.

Peer Instructor Evaluation Form

Communication		
Encourages students to think critically about the subject matter	2	Review questions were gone over thoroughly, explaining why certain selections might appear correct but were not.
Relates subject matter to students' lives	2	Did a unit conversion using gold, utilizing the price of gold and the preferred unit for measuring gold.
Conveys information in a clear manner	2	Coherent explanations of topic. Should avoid giving overly complicated explanations that exceed the level of instruction.
Responds adequately to student questions	3	Students feel free to ask questions and gives thoughtful and engaging answers.

Key:

3 = **Outstanding**: Employee's work *exceeds* expectations and standards.

2 = **Satisfactory**: Employee's work *meets* the expectations and standards in a fully adequate way.

1 = **Needs Development**: Employee's work *falls below* acceptable expectations or standards. Improvement is required.

Comments Section:

1) **What specific strengths did you identify in this Instructor?**

   Good command and enthusiasm for the subject matter. Several students felt comfortable engaging when confused.
   Good idea about displaying periodic table on monitors.

2) **Please list any specific changes recommended to strengthen this Instructor's instructional (classroom) effectiveness.**
   Working through examples step by step via slide is good for some examples, but it's helpful to work through examples on the board so students can see how you write it out and

approach the problem. Also can cover review material a little more quickly since it's already been lectured on before.

3) **Additional comments, if any.**

Additional comments: Mitch Halloran

• He's a good instructor, it's just the exams and the materials he covers don't make sense. The assignment homework also is a ton of workload. He also expects us to already know the material.

• Thank You for teaching me and sharing your knowledge and also for taking time on doing Zoom meeting providing extra help for the ones that can't assist to tutoring in person

• Just more visuals would be great and more feedback on the test would be appreciated.

• I wish I could retake this class and get rid of my grade. I don't understand most of the things he has taught us and basically have to fend for myself. As a full time student with two jobs, I expect my teachers to be clear and knowledgeable of the class that I am taking. It is understandable to study on your behalf to further understand and improve on the subject. On behalf of my fellow peers, I must say that I don't see how we will succeed in this class as I quote "I don't know why that's there on the lecture but I hope it is right" or statements like "please refer to Catherine to check and see what mistake you made" as the solution to when students are asking questions during class/lab.

• Dr. Halloran is very much engaged and goes above and beyond any time of need for clarification for any work we do. Hes very much appreciated!

• A great instructor, honestly my favorite one! He always goes above and beyond to help, and I really appreciate how patient he is when I don't understand something. He's also always available on zoom to answer questions. He gets two thumbs up from me!

• Professor Halloran is extremely available and makes it known the work needed for this course is.

• Professor Halloran is a nice individual and respectful. One thing though is that he isn't the best at teaching. It's kinda like a puzzle when he teaches, but all the puzzle pieces don't fit together. He's doing his job of what he has to say and explain, but sometimes in the end it just doesn't click.

• Mr.Halloran is a good person over all, however I'm afraid he isn't the best chemistry teacher available. I took this class because there was no prior knowledge about this professor, I do regret taking the course now because I feel as if I haven't learned anything. We cover many topics during lectures but we never fully finish them, he jumps from one topic to the next without completing the first topic. Similarly on his slides for lecture he often has the wrong slide of outdated information that he himself admits. On the most recent midterm around 3 questions were wrong and the same problem applies to the weekly HW assignments we have. Since he relies on an AI helper named Cathrine, most of my questions and answers I submit are labeled as incorrect. I confirm multiple times with my professor about this issue and yet he says try again or it's just Cathrine, this doesn't help me learn what I'm doing wrong. Overall I wish I had taken another professor for this class.

• Enjoying learning an intimidating subject and building confidence in understanding Basic chemistry in Dr. Halloran's class.

• There have been multiple occasions where the teacher has stated things such as, " I don't know why thats there, but I hope it's right" in reference to the material on the slides. This creates so much confusion and it makes it hard to trust the accuracy of the information that we are expected to learn. When errors are brought up the instructor frequently responds by saying he needs to "ask Catherine" about the issue. However students are not aware of who Catherine is. This ongoing reference adds to lack of clarity and confidence in the course structure. Also the instructor often appears unsure of the material during lectures. Personally I've had to rely heavily on teaching myself the course content outside of class in order to keep up. I am concerned about how this is affecting my academic progress and understanding of the subject. I would appreciate it if this situation could be reviewed so that students can receive clearer and more consistent instruction. Thank you for your time..

• Mr. H is an awesome teacher! He truly cares for his students and does everything he can to help us understand Chemistry 3A. I would take his classes over and over again.

• he lowkey sucks, he always gets lost during lecture. tbh idek if he knows what hes talking about or why hes in lecture. I say this with all respect but he doesnt seem capable of teaching

• I just wanted to take this chance to thank you for being such a cool teacher, I don't really like chemistry but you make the class and lab experiments fun.
